

Vyomakesh Dundigalla

August 1, 2026 | vyomakesh018@gmail.com | github.com/vyomakesh0728 | itsvyom.com | Bangalore, India

HIGHLIGHTED ACHIEVEMENTS

- Achieved 12.804 microseconds in NVIDIA GPU Mode's "nvfp4 block-scaled GEMM" optimization hackathon.
- Recorded 13.779 microseconds on an AMD Instinct MI355X in GPU Mode's "amd-mx4-mm" competition.
- Scored 0.848 public accuracy in Kaggle's NVIDIA Nemotron Model Reasoning Challenge.

EXPERIENCE

LiteFold

Founding AI Researcher

Bangalore, India
Apr 2026 – Jun 2026

- Contract role, working on protein sequence optimization for PLMs.
- Shipped protein-seq/struct RL environments.
- Generated synthetic-data trajectories for protein reasoning.

Zerobrew

Remote, Jan 2026

- Early maintainer of a leading download package manager with 7.5K stars on GitHub.
- Delivered a 3.6x download speedup (361s to 99s) with racing cancellation and HTTP/2 tuning.

PrimeIntellect-ai

Remote, Jul 2025 – Apr 2026

- Early core contributor to evals, with 5+ merged PRs spanning reproducible RL environments.
- Shipped WebVoyager Env [PrimeIntellect-ai/community-environments/WebVoyager](#).
- Shipped BrowseComp-Plus Env [PrimeIntellect-ai/community-environments/BrowseComp-plus](#).
- Shipped BALROG Env [PrimeIntellect-ai/community-environments/Balrog](#).
- Other verified environments shipped at [PrimeIntellect-ai/community-environments](#).

EDUCATION

MSc in Business in Blockchain & Society

Queen Mary University of London

London, UK
Sep 2022 – Oct 2023

- Topics of note:* Applied statistics, probability, graph theory, network science, linear algebra, econometrics, game theory, and discrete mathematics for cryptography.

Bachelor of Technology in Electronics and Communication Engineering

Keshav Memorial Institute of Technology (Aff. JNTU)

Hyderabad, India
Oct 2017 – Sep 2021

- Topics of note:* Calculus, semiconductor physics, electromagnetics, signal processing, control systems, digital logic, and microprocessors.

OTHER PROJECTS & PROPOSALS

- Dundigalla, V. (March 2026) *VGAC: Verifier-Grounded Agreement-Calibrated Reinforcement Learning for Long-Horizon Agents*. Independent research proposal. Available at: [PDF](#).
- [OpenGraphs](#) model-training observability in a TUI with 500+ npm downloads.

SKILLS

Programming Languages	Python, JavaScript, C/C++, Rust, CUDA
Libraries	PyTorch, Hugging Face, NumPy, Pandas, SciPy, Matplotlib, CuTeDSL
Infrastructure Frameworks	vLLM, FSDP, Ray, verl, DeepSpeed ZeRO, FastAPI, wandb
Technologies	Docker, sandboxes, cuda-gdb, SSH, $\text{\LaTeX}$, SLURM

CERTIFICATIONS

Deep Learning Specialization | *DeepLearning.AI*

Apr 2020
